Wireless Laser Parking System

Park in the same spot EVERY time with No more "dings"

Laser parking system has an integrated motion sensor to know when a vehicle is approaching. The laser is activated to align up at the position of your choice and shoots a bright, vertical laser beam from the mounted location so that you will be able to park in the same spot every time without fail.

- Simple and easy to install
- Can be aligned at a place of your choice

Wireless Doorbell

Safely see who is at your door before opening it

Wireless doorbell that alerts you inside the house upon activation. The coloured monitor will identify who is outside. You can communicate with the press of a button without having to physically go and open the door. A huge security advantage for those home alone and elderly.

- Simple and easy to install
- 60 metre range
- Night Vision
- Full colour 3.5" screen
- Can be wall mounted or free-standing
